

NEW HORIZON

JULY 12 - 27

thetrustees.org/newhorizon

The events will start at dawn with a tethered flight, followed by public access to the inflated balloon. In the late afternoon guest speakers will address selected themes about our collective future. As the mid summer evening approaches, the public will gather around the state-of-the-art hot air balloon to watch as the reflective orb transforms into a generative light sculpture that responds to live musical performances. Pedro Alonzo, curator of the New Horizon project, collaborated with Doug Aitken to select the speakers. Zach Tetreault, the co-founder of the FORM music festival, collaborated with Doug Aitken to curate the musical performances for each event.

FRIDAY — JULY 12 6 PM

FUTURE OF CREATIVITY

Long Point Wildlife Refuge,
Martha's Vineyard

Bang on a Can

ART & THE LANDSCAPE AT THE TRUSTEES

Trustees is dedicated to increasing public appreciation and use of its properties. Core to this are creative efforts to reach and engage new and expanded audiences through powerful experiences at Trustees' properties. The Art & the Landscape initiative is designed to allow artists to expand their practice within the unique environment. With the commitment to changing the paradigm of artwork in public space from objects that are meant solely to be observed and contemplated, to structures that are catalysts for interaction, exchange, dialogue, and participation. Art & the Landscape will tie together threads of art, nature, community, and history.
